

Keyboard / Vertical Staff Guide

(c) Adrienne McKinney 2017

Instructions:

- * Print, making sure the settings indicate actual size. Do not select “fit to page,” or any other scaling. Laminate, or use card stock for stability.
- * Fold or cut the diagram out of page 1 along the top, left-hand side, and bottom. Leave the margin on the right-hand side
- * Fold or cut the diagram out of page 2 along the top, left-hand side, and bottom. You may wish to trim the right-hand side to remove the partial G key.
- * Place the LEFT edge of page 2 over the extra margin of the RIGHT edge of page 1, so the C is lined up carefully at the light gray line next to the B.
- * Tape or glue the two keyboards into one long strip (optional – you can just set them behind the keys and overlap the edges).
- * Place behind the keys of the piano, to use as a reference, or use as a worksheet/theory tool. The guide is left mostly unmarked so teachers can add their own notes. I recommend laminating the guide, and marking it with dry-erase markers.
